CPE Router Installation	Included		Included		Included	

**CPE:** At the customer premises we will install an outdoor Router/Antenna enclosure to ensure you receive the best possible signal quality and strength that can be achieved at your location. This type of installation ensures up to 30% more improved network efficiencies and data throughput which will result in a reliable, consistent user experience. The outdoor unit is connected via a network cable (PoE – Power over Ethernet) to an indoor unit to which the customer can connect via WiFi or normal network cables. The equipment remains the property of About IT Online / Neotel and as such is managed by About IT Online / Neotel for business peace of mind.

**Fair Use Policy:** Since the service is provided as an uncapped service, a Fair Use Policy applies to ensure the user experience across the network remains at the high quality we have developed. The NeoBroadband Fair Use Policy (FUP) is the best and most considerate in the market, always keeping in mind your requirement to run your business. As opposed to our competitors, at no point will the FUP policies resort to the disconnection of your service or degrading the quality to such an extent that you will find it difficult to do the simplest of tasks such as sending a basic email. Our FUP work as follows: We calculate the maximum amount of data you are technically able to consume during a month and set our limit to half of that. Once you reach this halfway milestone we do not degrade your service to a snail's pace, we simply halve your available throughput for the remainder of the month. This ensures that you are still able to effectively run your business albeit a bit slower than normal.

**Asynchronous:** The one distinction between our Wireless based NeoBroadband products (WiMax and LTE) and our Fiber based NeoBroadband product is that we provide asynchronous data throughput speeds across our wireless networks as opposed to synchronous on Fiber. Asynchronous means your maximum download speed is higher than what you would be able to achieve from your upload speed. On fibre you are able to send and receive data at the same speeds.

**Contented Service:** In order to offer cost effective price points the NeoBroadband LTE service (as is the same with our market leading NeoBroadband Fiber and WiMax services) is provided as a Best Effort / Contented broadband service. However, the NeoBroadband contention ratios implemented within our existing products are much lower than the industry norm which relates directly to the quality user experience we achieve based on the independent views of the Broadband community as a whole.
